

The Agroforestry Show

10 - 11 September 2025, Woodoaks Farm

agroforestryshow.com

Show Guide

Shade and shelter. Natural temperature control.

Shade and shelter are increasingly important for the health, welfare and productivity of your livestock. Agroforestry will help your land work harder for everyone – including vital wildlife species. Talk to us for bespoke one-to-one advice and up to 100% funded trees and protection.

Sue Lacey

Soil Association/The Woodland Trust

Soil Association/The Woodland Trust

The Soil Association and Woodland Trust have teamed up to bring you the Agroforestry Show – combining over 125 years' experience and specialist knowledge across the agriculture and forestry sectors.

The Soil Association has worked with farmers on the ground since 1946, continually advocating for practical and financial support for agroecological practices like agroforestry.

The Woodland Trust is the UK's largest woodland conservation charity, with expertise in planting, protecting and restoring trees and woodland across the UK.

Together we are a natural team for helping farmers make agroforestry mainstream in the UK.

Soil Association/The Woodland Trust

Welcome to the Agroforestry Show 2025

Rose Lewis
Head of
Woodoaks Farm

From the farm

We're thrilled to welcome you to Woodoaks Farm for the UK's second ever Agroforestry Show. This flagship event will celebrate the powerful combination of trees, food and farming.

Woodoaks Farm is a 300-acre organic farm on the edge of the Chilterns, generously gifted by its former owner, Sally Findlay, to the Soil Association Land Trust. This bold act secured the long-term future of the land for sustainable farming, wildlife restoration, and public benefit.

Since then, we've been working to bring that vision to life – putting nature and people at the heart of the farm. From reintroducing hedgerows and restoring meadows, to running farm-based education programmes and welcoming hundreds of volunteers, Woodoaks is evolving into a hub for practical action and community connection.

You'll see a landscape in transition: young agroforestry plots, naturally regenerating scrub and woodlands, wildlife corridors, and new spaces designed to host learning, growing, and collaboration. It's all part of our mission to reconnect people with food, farming and the natural world – and to show what a regenerative future could look like in practice.

We're just at the start of our agroforestry journey, learning as we go about what works and what doesn't. We are looking forward to partnering with the Woodland Trust and the Soil Association so we can continue our learning journey. Like you, we will also be looking forward to the farmer-led learning, hands-in-the-soil inspiration and new techniques that will be on offer at the event alongside a range of commercial sponsors and exhibitors.

We hope you enjoy what Woodoaks Farm has to offer and leave feeling energised, informed, and part of a growing movement.

Thank you for being here. You're part of the future we're trying to grow.

Helen Chesshire,
Lead Advocate
- Farming &
Agroforestry,
Woodland Trust

Ben Raskin,
Head of
Agroforestry,
Soil Association

From the organisers

After the huge success of the first Agroforestry Show, we are delighted to welcome you to Woodoaks Farm for an even bigger and better show for 2025. Discover more inspiring sessions, demos, farm walks and one-to-one advice sessions, alongside the all-new Training Hub. This exciting addition offers in-depth sessions, the latest on agroforestry research and an opportunity to try out online agroforestry planning tools. And finally, don't miss the evening's musical entertainment. Enjoy the show.

Welcome to Transition

– a *Farmers Weekly* initiative to secure a more sustainable future for your farm business

SPECIAL AGROFORESTRY SHOW OFFER

SAVE £1 per issue

on a 12-month subscription to *Farmers Weekly* using **code AF25**

As well as producing food, forward-thinking farmers today are refocusing their goals to ensure they thrive as businesses while looking after the environment.

This means improving soil health, air and water quality, nurturing biodiversity and often storing carbon to help mitigate climate change.

We are pleased to be part of this year's Agroforestry Show – sharing our knowledge and highlighting ways we can make this Transition together.

Working side-by-side, our goal is the same as yours: a sustainable future for British agriculture and for your farm business.

Unlock the benefits of agroforestry with the Woodland Trust and Soil Association

Being a farmer, forester or land manager in 2025 is full of uncertainties and challenges. You'll have first-hand experience of the changing climate impacting your business, and the unpredictability of government decisions. We know you need solutions and agroforestry can deliver on all fronts. It will help your business adapt, bring resilience into farm enterprises and spread risk whilst helping to tackle the nature and climate crisis.

We're here to help. We want to demystify the practice of agroforestry and promote its adoption throughout the UK. Our expert advice and funding support has already helped thousands of farmers to integrate trees into their farming systems.

Our approach

A network of outreach advisers providing one-to-one support

Our advisers are trained to provide bespoke, free and in-person advice to farmers and landowners on native woodland expansion, agroforestry and managing ancient and veteran trees.

Funding

We offer a range of funding support to help farmers and landowners to plant trees and woods and will signpost you to the most appropriate source for your project.

Advocating for policy and landowner change

We work in partnership across farming and forestry to demonstrate the value of trees and woods on farms to your peers, policymakers and parliamentarians, including through farm visits, speaking at farming events and presenting evidence.

Get in touch

Email plant@woodlandtrust.org.uk
or call us on **0330 333 5303**

WOODLAND
TRUST

Working with farmers, growers and foresters to enable the urgent need to transition towards farming and land use strategies that will not only feed the world but also benefit climate, nature, and people.

We provide on the ground technical and peer-to-peer knowledge exchange and promote agroforestry to the wider community through campaigning and publicity work.

Together with our partners, we have ambitious plans to make agroforestry the norm in the UK. We want to support farmers in a way that not only delivers public goods for society but, just as importantly, rewards them and their businesses with profitable new markets and resilient farming systems.

What we do

- Facilitating more organisations to build agroforestry into their strategy through strategic plans that best support farmers and landowners.
- Supporting the better management of farm woodland. We're providing support to integrate existing woodlands into agroforestry systems and provide advice for better and more holistic management of trees on farms.
- Training the Trainer. We offer bespoke courses that cover all aspects of agroforestry including design, implementation, maintenance and harvesting of a system.
- One-to-one and one-to-many support, for instance our e-learning course, The Agroforestry Handbook, agroforestry learning networks and individual support.

Get in touch

If your farm or organisation needs help with any of the above, get in touch:

Email producer.support@soilassociation.org
or call us on **0117 314 5100**

REFOREST

Agroforestry can transform your land, your livelihood, and European landscapes.

ReForest supports farmers to:

- **Improve** soil health, biodiversity, water retention and climate stability
- **Boost** productivity and economic resilience; diversify incomes and find support
- **Use** the power of digital tools in real life activities

Talk to the people behind ReForest network

ReForest gathers evidence and tools from **8 Living Labs** across Europe—designed by farmers, for farmers.

See the tools in action

Get a demo of our **tools** for smarter agroforestry choices. Visualise impacts, compare outcomes, and plan with confidence.

Get hands-on experience during our free training sessions.

Take part in **10+ practical sessions**, tailored to your interests.

Co-create the future of European farming

Meet the team, ask your questions, and discover how you can be part of the **ReForest community**. Keep the conversation going on the ReForest platform.

Find us at the
Black Barn!

Funded by
the European Union

This project has received funding from the European Union's Horizon Europe research and innovation programme under grant agreement No. 101060635 (REFOREST).

UK Research
and Innovation

UK partners are funded by UK Research and Innovation (UKRI) under UK government's Horizon Europe funding guarantee [grant number 10039700].

Ask the experts

Receive free 1:1 advice at the Advice Hub

In addition to the exciting programme of talks, a free drop-in Advice Hub is running throughout both days, giving you the opportunity to share your ideas and questions with advisers and specialists from Soil Association, Woodland Trust, Forestry Commission, Natural England and other third party advisers.

Bring along a map of your farm or agroforestry designs to get expert insight and top tips to get your project up and running.

There will also be plenty of opportunity to connect with tree nurseries, equipment suppliers, researchers and funders to discuss your plans so that you walk away from the event ready to get started.

Sign up for a session on the board outside the Advice Hub tent.

Don't miss the all new Training Hub

The Training Hub is a dedicated venue delivering hands-on, practical knowledge from the field and research projects. A packed schedule of fast-paced, 25-minute sessions with leading farmers, researchers and advisers will offer a focused look at essential agroforestry topics. They'll share real-world insights on everything from financial planning tools to tree fodder and the role of hedgerows. See available sessions at a glance on page 18.

Next to the barn, explore live demos of digital planning and management tools and share your thoughts on current knowledge gaps with researchers. You can also browse the show's most comprehensive display of agroforestry resources courtesy of our partner stands, including the Farm Woodland Forum, Irish Agroforestry Forum and European Association of Agroforestry (EURAf) map of agroforestry sites.

The Training Hub is brought to you in collaboration with REFOREST, DIGITAF, Organic Research Centre, Cranfield University and Agricollogy.

See our map on pages 16-17 for the Advice Hub and Training Hub locations.

Tree planting grants for farmers and landowners

England's Community Forests offer one of the most competitive grant schemes for tree planting. With years of experience and locally based support, our teams will help you plan, fund and deliver woodland creation projects of all sizes that will bring real value to your land.

Scan the QR code or visit
www.englishcommunityforests.org.uk/landowners

AffinityWater are proud sponsors of the **Agroforestry Show 2025**

At this Hampshire Farm, co-funded by Affinity Water, the young trees are planted with flower mixes to support pollinators and soil health.

Innovative agroforestry projects enhance water infiltration for groundwater recharge, help manage flood risk and provide habitats for beneficial insects, whilst also aiding nutrient cycling within the soil.

To find out more about our funding schemes which could help support your agroforestry projects, please contact:

catchmentmanagement@affinitywater.co.uk

Farm walks

While at the event we ask that you kindly follow the principles of the Countryside Code.

- Please use bins provided – we are aiming to leave no trace.
- The event site has uneven ground in places due to the nature of the outdoor location.
- Please stay on dedicated walkways where present.
- Please extinguish any cigarettes properly and do not smoke in any marquees or gazebos.
- Use of drones is not permitted anywhere on the site.
- Please respect our neighbours when leaving the site.
- Well-behaved dogs on leads are welcome at the event and campsite.

Event map

Please refer to pages 10-12 for exhibitor details

Session details - Day one - Wednesday 10th

Session name	Description	Time	Location
Opening plenary With Helen Chesshire, Ben Raskin and Tom Curtis	Welcome to the show! Tom Curtis brings alive the transitional journey that has begun at Woodoaks Farm. Hear his thoughts on the need for building resilience in the whole food supply chain, opportunities in peri-urban commercial farming, and how landlords and tenants can work towards regenerating land together.	9:30	Sainsbury's and Lloyds Banking Group Tent
Woodoaks Farm tour With Steve Dutch	Woodoaks Farm tour with ranger Steve Dutch.	10:00	Farm walks
Adapting our growing systems for climate change With Ben Raskin and Martin Crawford	This session will look at how farmers and growers of all types and scales can continue to be productive and resilient in the face of uncertain climatic challenges. Martin has decades of practical and research experience with complex polycultural systems and will explore how this learning can inform our integration of trees into farming in the UK.	10:00	Sainsbury's and Lloyds Banking Group Tent
Tree selection for agroforestry With Dr. Colin Tosh and Dr. Tom Staton	Stumped as to what trees to plant on your farm? Join this workshop to learn how to select the right trees to maximise productivity and minimise competition in both silvoarable and silvopasture systems.	10:00	Shakespeare Martineau and Marrons Tent
What does a climate-resilient farm look like in 2050? With Dr. Claire Whittle and Chris Harrap	Join us for a practical look at how farms can adapt and thrive in a changing climate. We'll compare landscapes with and without agroforestry, break down simple, effective steps you can take to get started, and hear directly from farmers already making it work. Learn how combining trees, crops, and livestock can build resilience, protect your land, and boost your bottom line.	10:00	Farmers Weekly Tent
How to assess farm woodland condition With Emma Wood, Paul Orsi and Chris Tomlin	How healthy is your farm woodland? What does a healthy woodland look like, and how can you measure its condition? All will be answered in this session which introduces the new Woodland Condition Assessment app. This app transforms woodland surveys by simplifying data collection and generating quick and accurate woodland health reports. This session is followed by a practical demonstration of the app during a tour of Woodoaks' woodland.	10:00	Affinity Water Tent
Starting out with silvoarable With Stephen Briggs	Alley cropping systems are emerging across the arable heartlands of Britain. What are these in-field lines of trees achieving for the arable crop, the farm system in its entirety, and the wider environment? When will they make sense for the farmer and what are the first steps in their design and establishment? This session will be a primer for silvoarable, navigating potential adopters to sources of support and information.	10:00	ReForest Training Hub

Session details - Day one - Wednesday 10th

Session name	Description	Time	Location
Tubex tree guards and shelters With Peter Stevens and Jack Readman	Tubex will showcase over 40 years of tree shelter development, including their original 1985 tree shelter, pioneering unique features such as the Tubex flared top, laser line and re-release zip ties. They will also demonstrate more recent innovation such as the industry's first collection and recycling scheme and the launch of their 'Nature' biodegradable range.	10:30	Demo area
Starting out with silvopasture With Dr. Lindsay Whistance	The most traditional form of agroforestry in the UK and Europe is grazing lands in and around trees. This session will introduce wood pasture and newer silvopastoral systems, their benefits to livestock farming, and how to go about their planning. We will draw upon the experience of the ReForest Northern England Living Lab and see examples of silvopasture in action in the British uplands.	11:00	ReForest Training Hub
The Farrelly method - electrifying agroforestry fencing demo With Fred Farrelly	Farmer innovation at its best. Fred Farrelly, a farmer from Ireland, has devised and refined a low tech approach to fencing trees within his silvopasture fields. The method not only eliminates loss of grazing land, it also helps root growth and reduces plastic use.	11:00	Demo area
Fungal compost walk With Daniel Iddon	The importance of fungal communities in forestry, agroforestry and agriculture soils and how to create fungi compost.	11:30	Farm walks
Farmers Weekly question time With Johann Tasker, Emily Norton, John Pawsey, Fraser McAuley, Caroline Harrison and David Brass	Join Farmers Weekly for one of their acclaimed Question Time panels, chaired by Johann Tasker. You will have the opportunity to submit questions in advance or directly to industry leaders on agroforestry and the broader issues affecting UK agriculture.	11:30	Sainsbury's and Lloyds Banking Group Tent
Upland agroforestry With Tabitha Acton, Sarenta King, Dan Westbury and Hamish Wilson	Join a guided discussion between farmers trialling agroforestry in the uplands of mid-Wales, as they share insights into the benefits, challenges, and financial viability of integrating trees into their farming systems. This session will explore how agroforestry is helping address the pressures of climate change while supporting resilient and productive land management.	11:30	Affinity Water Tent
Using wool to protect trees - With Cheviot Trees With Jonathan Cameron and Tim Oliver	Explore the use of BioWool mulch mats, made from UK waste wool, to improve tree establishment and suppress weeds naturally. This session will demonstrate how BioWool works, including its deer-detering lanolin properties, degradation process, and application techniques. Learn how this sustainable mulch mat can replace imported alternatives and help ensure healthier, more successful tree growth on your farm or project.	11:30	Demo area

Session details - Day one - Wednesday 10th

Session name	Description	Time	Location
Woodland Condition Assessment (practical demo) With Emma Wood, Paul Orsi and Chris Tomlin	This farm walk follows on from the session 'How to assess farm woodland condition' (Affinity Water Tent) and features a practical demonstration of the new Woodland Condition Assessment app developed by Forestry Commission, Sylva Foundation and Field Studies Council.	12:00	Farm walks
Finding common ground between farming and forestry With Lottie Alves, Tom Kemp and Richard Thomas	A farmer and a woodland manager share their perspectives and agroforestry journeys with each other in this deep dive session. This session will explore what motivated them to start their agroforestry journeys, what agroforestry means to them and how it looks in their systems, what opportunities and challenges have arisen during their journeys and what their plans are for the future of their systems. The session will end with an audience Q&A.	12:00	Shakespeare Martineau and Marrons Tent
Agroforestry for nature recovery With Emma Dear, Beth Bridge, Geoff Newman, Sophie Mott and Iain Tolhurst MBE	Discover key principles for integrating agroforestry into farming to boost biodiversity, soil health, and ecosystem resilience. An agroforestry specialist will introduce nature recovery principles, followed by farmer panellists sharing practical examples from their agroforestry systems. Learn how trees on farms benefit wildlife, carbon storage, and farm productivity. A Q&A will offer insights from practitioners, ideal for farmers and landowners seeking actionable, nature-positive solutions.	12:00	Farmers Weekly Tent
Life cycle assessments of agroforestry and orchards With Elsa Webb	What is the most effective way of maximising the benefits and reducing the environmental costs of growing apples, growing cereals, or sequestering carbon? PhD student Elsa Webb will explain her research on the life cycle assessment of agroforestry, orchard and Miyawaki forest systems.	12:00	ReForest Training Hub
Rickey's Alkaline Market Garden & Fruit Forest With Rickey Bryan	Regenerative closed loop systems and farm tech for alkaline soils.	13:00	Farm walks
Introduction to tree fodder With Dr. Lindsay Whistance and Matt Smee	This session will explore tree fodder, its benefits, challenges, and how farmers can integrate it into farm systems. We will highlight tree hay, which has been used for over 3,000 years, predating traditional meadow hay. Though now rare in modern European farming, it offers valuable nutrition and resilience for livestock.	13:00	ReForest Training Hub
Helping tree roots thrive with our mycorrhizal inoculant With MycoChar	MycoChar introduces a diversity of beneficial mycorrhizal fungi spores directly to tree roots at planting. These fungi form intricate symbiotic relationships with the tree's root system, significantly increasing its surface area. Water and nutrient uptake are enhanced, optimising the tree's growth and disease resistance. Join us to learn more about the product, what sets it apart from other inoculants on the market and how we have been using it on our own tree planting projects for the last several years.	13:00	Demo area

Session details - Day one - Wednesday 10th

Session name	Description	Time	Location
Mulching for successful tree establishment With Matt N Mulch	Learn how to ensure full tree establishment within two years through an understanding of soil, weeds and moisture, and how to mulch effectively to confidently establish healthy trees in real-world conditions.	13:30	Demo area
Hedgelaying farm walk With Dean Dyer	Join champion hedgelayer Dean Dyer on this walk looking at the hedges at Woodoaks as he explores hedgelaying and management.	14:00	Farm walks
Making nature work for your farm With Tom Bridge, Jennie Wheildon, Amy Cowdell and Jacqueline Jackson	Join Tom Bridge as he explores real-life estate case studies covering Biodiversity Net Gain (BNG) schemes, regenerative farming, and natural capital projects. He'll be joined by a panel from Marrons and Shakespeare Martineau for a Q&A discussion on unlocking commercial opportunities through conservation. Topics include eco-tourism, the evolving BNG market, and what to watch out for in related agreements. This session offers practical insight into turning environmental goals into sustainable business growth.	14:00	Sainsbury's and Lloyds Banking Group Tent
Scaling agroforestry: farm, estate, landscape and county scale With Vicki Hird, Professor Steven Newman, Tom Fairfax and Tom Tame	This session explores the practical, policy, and procedural aspects of expanding agroforestry in the UK. Drawing on experience from Spains Hall Estate in Essex, Mindrum Estate in Northumberland, and a Hampshire-wide project, the panel will discuss planning within regenerative farming systems, securing funding, and collaborating with neighbours to maximise wider benefits and synergies.	14:00	Affinity Water Tent
Greenhouse gas calculators for trees on farms With Dr. Paul Burgess	In this session, we will explore how trees are included in a greenhouse gas accounting framework as part of a new Land Use for Net Zero Footprint project.	14:00	ReForest Training Hub
Making high-quality biochar With Luke Breddon and Ed Bonn	Understand the process of making your very own high-quality biochar. Luke, who owns Slatehill Charcoal Co in North Wiltshire, manufactures high-quality US designed biochar kilns.	14:00	Demo area
Using coppiced willow in productive agroforestry systems With Kevin Lindegaard, Jamie Rickerby and William Macalpine	A farm walk looking at willow coppice strips recently established on the farm. The expert team will showcase the many benefits willow can provide farmers, including increasing biodiversity and farm income as well as improving agricultural efficiencies.	14:30	Farm walks
From field edges to farm income: making agroforestry pay With Justin Mumford	This session offers practical guidance on how to make field edge agroforestry align with food production, climate change resilience, and conservation goals. You'll learn about site assessment, layout design, and species selection, along with the market potential for tree-based products and available grant support. Real-world case studies will illustrate successes and challenges helping you to develop your own agroforestry designs.	14:30	Shakespeare Martineau and Marrons Tent

Session details - Day one - Wednesday 10th

Session name	Description	Time	Location
Walnut viability as commodity crops in the UK With Tom McVeigh	Discover the potential of walnuts and hazelnuts as profitable agroforestry commodity crops in the UK. Drawing on his Nuffield Scholarship research, Tom McVeigh will delve into establishment costs, yield expectations, market opportunities, and potential profit margins. Learn how these hardy trees could diversify farm income, enhance biodiversity, and fit into both conventional and agroforestry systems. Ideal for farmers considering long-term investments with ecological and economic benefits.	14:30	Farmers Weekly Tent
Rural crime: removing ignorance and reducing complacency. A Chartered Security Professional's perspective With Optimal Risk	Join Frank Cannon, from Optimal Risk, to run through simple yet often overlooked strategies to protect your farm and farm machinery.	15:00	Demo area
Financial tools for agroforestry With Dr Anil Graves and Dr Laura Cumplido-Marin	In this hands-on session, staff from Cranfield University will explain how they are using a range of digital tools to predict and describe the financial and economic costs of agroforestry systems.	15:00	ReForest Training Hub
Graze it well: integrating mob grazing livestock systems in agroforestry With Progressive Farming Company	Learn how to use tree rows, fencing and livestock to build regenerative, profitable grazing systems. This session covers paddock design, mob grazing, grass growth, and livestock group sizing. Discover how tree alleys support stock flow, forage access and land resilience, maximising pasture profit while improving biodiversity, soil health and whole-farm productivity.	15:30	Demo area
Farm woodland opportunities With Clive Thomas	Whilst only a few farms have formalised in-field agroforestry currently, almost every farm has some woodland. Like hedges, the opportunities for these woodlands to deliver more farm benefits are often overlooked. Woodoaks Farm is no exception. With the revised agroforestry handbook now having a chapter on farm woodlands, join this walk to explore and discuss these opportunities, including woodland products, integrating livestock and using woodlands as a diversification setting.	16:00	Farm walks
What it takes to go organic: a tour of a farm in conversion at Woodoaks With Jerry Alford	A farm tour focusing on what it takes to go organic. The walk explores the conversion process and changes in the farming system as Woodoaks transitions to certified organic.	16:00	Farm walks

Session details - Day one - Wednesday 10th

Session name	Description	Time	Location
Growing money on trees: innovative finance for agroforestry With Ben Makowiecki, Bernie Davies and Thomas Gent	Agroforestry offers an attractive opportunity for farmers and investors by combining revenue from tree-derived products (e.g. fruits, nuts, timber), natural capital markets and public support. Panellists will explore innovative financing models for agroforestry, focusing on how to access and blend private funding with grants and subsidies to diversify income streams.	16:00	Sainsbury's and Lloyds Banking Group Tent
Planting trees on borrowed land With Helen Browning OBE, Louise Staples, Kevin Kennedy and Steve Whitby	Explore the challenges and opportunities for agroforestry on tenanted farms and as part of a multi-enterprise holding. Hear about new environmental farm business tenancies and how to stack multi-enterprises on a single farm holding. The Woodoaks Farm tenant will share their experiences as the farm transitions.	16:00	Shakespeare Martineau and Marrons Tent
Biodiversity Net Gain through trees on farms With Emily Norton, Anna Cartledge, Chris Cooper and Kate Russell	Explore how farmers can access Biodiversity Net Gain (BNG) funding to support tree integration on farms. This session features a live case study of a proposed habitat bank at Woodoaks, which can be visited during farm walks. A cross-disciplinary panel will address practical delivery questions, offering insights into BNG scope, exclusions, unit sale strategies, and the financial timeline from initial setup to income generation.	16:00	Farmers Weekly Tent
Livestock breeds for silvopasture With Tracy Wathen-Jones, Tom Fairfax and Dr. Claire Whittle	'Right tree, right place' is a common phrase in agroforestry, but in silvopasture, selecting the right breed and density is just as vital. This session explores practical integration strategies, breed selection, and ecological benefits through case studies of native livestock in agroforestry. Learn how controlled grazing and breed traits support resilient land management, while gaining insights into overcoming challenges and unlocking the environmental and economic benefits of integrating livestock into agroforestry systems.	16:00	Affinity Water Tent
Agroforestry design workshop With Niels Corfield	Alley cropping, wood pasture, shelterbelts, hedgerows - the range of agroforestry systems is vast! In this interactive workshop, you'll learn how to design agroforestry across a whole farm and explore how different tree planting approaches can meet multiple goals: boosting productivity, diversifying income, restoring landscapes, and weather-proofing your farm. Gain practical insights and leave equipped to integrate trees into your farming system with purpose and impact.	16:00	ReForest Training Hub
Wild City With Jon Davies and Steve Williams	How do we unlock a wilder urban experience? In this session, Wild City will share their pioneering techniques and approaches in both public and community spaces. With the Markfield Legacy Garden as a demonstration ground, they will explore brownfield and substrate design, food forestry principles, ecological gardening techniques and the impact of these on our social and mental health for a future of urban stewardship. Be inspired by an exciting journey of experimentation within the city and beyond.	18:00	Shakespeare Martineau and Marrons Tent

Woodland Carbon

Under our Woodland Carbon scheme, new woodland planted on your land locks up carbon emissions and supports nature's recovery with the added bonus of extra income.

How it works

1

We make sure you meet the eligibility criteria; check ownership details, that planting is over 5 hectares and there are no restrictions on the title.

2

One of our Woodland Creation Advisers will arrange to have a look over your site and discuss your proposed planting with you.

3

We then calculate the amount of carbon you could lock up through new tree planting and propose an offer.

4

Once agreed we will design a scheme suited to your site and together we'll sign an agreement.

5

Before planting starts, we will register your scheme with the Woodland Carbon Code (WCC), a quality assured, government endorsed and internationally recognised carbon scheme that generates independently verified carbon units.

6

Your site is planted with native trees and is validated.

7

Once validated you will receive payment.

8

We will be responsible for reporting under the Woodland Carbon Code going forward and throughout the agreement.

WOODLAND
TRUST

The Woodland Trust, Kempton Way, Grantham, NG31 6LL

Session details - Day one - Wednesday 10th

Session name	Description	Time	Location
Silvohorticulture With Andy Dibben	With heavy rain, strong winds and long periods of drought all becoming more common, how can trees help growers cope with climate uncertainty? Join Andy Dibben to learn about silvohorticulture system design, tree crops, and how to get the most benefits from integrating trees with horticulture crops while avoiding common mistakes.	18:00	Farmers Weekly Tent
Truffle agroforestry systems With John Booth	Join John Booth in an underground exploration of the world of truffle farming to learn how these flavoursome fungi not only attract a pretty price tag, but can also contribute to enhancing soil health, carbon sequestration, and biodiversity. This session will also cover practical guidance on soil preparation, tree selection, mycorrhizal inoculation, and orchard maintenance.	18:00	Affinity Water Tent
What's this wood doing here? Dusk wildlife walk With Rob Craine	An evening amble through ancient semi-natural woodlands (Ladywalk Wood and Bottom Wood) with ecologist Rob Craine. A chance to explore the natural landscape, to learn about the importance woodlands hold for sustaining people as well as wildlife, and to unwind from the busy day's events.	19:15	Farm walks

Session details - Day two - Thursday 11th

Session name	Description	Time	Location
Using coppiced willow in productive agroforestry systems With Kevin Lindegaard, Jamie Rickerby and William Macalpine	A farm walk looking at willow coppice strips recently established on the farm. The expert team will showcase the many benefits willow can provide farmers, including increasing biodiversity and farm income as well as improving agricultural efficiencies.	9:00	Farm walks
Biodiversity Net Gain at Woodoaks With Jon Haines and Chris Cooper	Walk the site and see first-hand how a habitat bank works in practice. The panel will point out key features like habitat selection, boundary management, and monitoring systems. Discuss real-world challenges, from soil prep to buyer agreements, while learning how Biodiversity Net Gain (BNG) income scales over time. Leave with a clear picture of the work required and potential returns. Wellies recommended!	9:00	Farm walks
Severn Treescapes: landscape connectivity and public goods through agroforestry With Ross Wingfield, Will Masefield and Merry Albright	Trees hold the potential to transform the way we manage our land - not just for nature, but also for communities, climate resilience, and rural economies. In this discussion between RESTORE and Gloucester Wildlife Trust, hear about a bold new landscape-scale agroforestry project, the Severn Treescapes, and gain practical insights on what it takes to make agroforestry deliver ecosystem services, food production, job creation and other public goods at scale.	9:00	Sainsbury's and Lloyds Banking Group Tent
Forestry practices for agroforestry With James Ramskir-Gardiner, Dr. Gary Kerr and Luke Hemmings	Planting trees on farms is one thing but managing them to produce high-quality timber to market specifications takes knowledge, skill and patience. In this session James Ramskir-Gardiner and Dr. Gary Kerr will share practical knowledge and tips from silviculture to help put the forestry back in agroforestry. They'll cover various aspects of tree management for timber production including establishment, protection, pruning, and harvesting.	9:00	Shakespeare Martineau and Marrons Tent
Walnuts for profitable agroforestry With Tom Tame	Can you grow walnuts profitably in a silvopasture system without external funding? The short answer: yes. Tom Tame has been producing walnuts mixed with sheep on his family farm in Warwickshire since 2015 and has developed a variety of added value products including cold-pressed oils and cosmetics. His business now sells walnut trees and offers inspiration and advice to others looking to revive British nut production.	9:00	Farmers Weekly Tent
Pigs: the key to sustainable healthy woodlands & happier animals With Helen Chesshire, Alex Gray, Tom Kemp and Helen Browning OBE	Join this panel discussion to hear all about the merits of raising pigs in woodlands. The session will dive into the practicalities and root out the potential benefits for both the woodland and pigs.	9:00	Affinity Water Tent

Session details - Day two - Thursday 11th

Session name	Description	Time	Location
Introduction to hedges and boundary agroforestry With Megan Gimber	The quickest wins for agroforestry are often the hedges, shelterbelts and trees found on field boundaries. This session will introduce how to maintain and enhance this incredible on farm tree resource to get the most out of its potential to support the farm and its business. We will discuss practical steps in valorising existing hedgerows and creating new ones and will signpost people to sources of further guidance, work that highlights their value for wildlife, and analysis showing where hedgerows should be restored for national impact on society and the economy.	9:00	ReForest Training Hub
Graze it well: integrating mob grazing livestock systems in agroforestry With Progressive Farming Company	Learn how to use tree rows, fencing and livestock to build regenerative, profitable grazing systems. This session covers paddock design, mob grazing, grass growth, and livestock group sizing. Discover how tree alleys support stock flow, forage access and land resilience, maximising pasture profit while improving biodiversity, soil health and whole-farm productivity.	9:30	Demo area
Agro-silviculture: tree establishment and care in agroforestry systems With Dr. Will Simonson and Paul Jackson	Some farmers may be experienced at managing trees, but for many thinking of agroforestry there is still much to learn from the world of silviculture. Experienced tree professional Paul Jackson and Dr. Will Simonson will share top tips on the necessary skills, time and expense required to look after the trees properly.	10:00	ReForest Training Hub
Golden Rose Flower Farm walk With Melanie Jones-Bharadwa	Join Melanie of Golden Rose Flower Farm, growers of artisan seasonal British flowers, for a tour of the flower farm and a discussion about how to build decorative woody species into your growing area.	10:00	Farm walks
Making high-quality biochar With Luke Breddon and Ed Bonn	Understand the process of making your very own high-quality biochar. Luke, who owns Slatehill Charcoal Co in North Wiltshire, manufactures high-quality US designed biochar kilns.	10:00	Demo area
Measuring the carbon impact of agroforestry With Rob Purdue, Stuart Rogers and Dave Oates	Farmers Stuart Rogers and Dave Oates share their experience working with the Farm Carbon Toolkit to measure the impact of agroforestry on their farms' carbon footprints.	10:30	Farmers Weekly Tent
Farm gate chat With Will Evans, Stephen Briggs and Jim O'Neill	Join farmer and columnist Will Evans as he chews the cud with silvoarable farmer Stephen Briggs and Forestry Commission's Jim O'Neill. This is an opportunity to learn about the history and current development of agroforestry in the UK and abroad as well as insights about the future trajectory of trees on farms from two of the UK's leading proponents of agroforestry. Plus there will be plenty of time for your own questions.	10:30	Affinity Water Tent
Mulching for successful tree establishment With Matt N Mulch	Learn how to ensure full tree establishment within two years through an understanding of soil, weeds and moisture, and how to mulch effectively to confidently establish healthy trees in real-world conditions.	10:30	Demo area

Session details - Day two - Thursday 11th

Session name	Description	Time	Location
Trees for livestock health and welfare With Tabitha Acton	Learn more about how trees can benefit your livestock. We will look at existing tree provision and explore how we might enhance this with new plantings or different management of woody species.	11:00	Farm walks
Woodoaks Farm tour With Steve Dutch	Woodoaks Farm tour with ranger Steve Dutch.	11:00	Farm walks
Developing markets for specialist agroforestry products With Rowan Dumper-Pollard, Lou Astbury, Muji and Merry Albright	Finding a market for products from the trees in your system can be tricky. This session will explore some of the more specialist opportunities, including case studies from Europe and two UK-based companies making a feature of agroforestry in their product design and marketing.	11:00	Sainsbury's and Lloyds Banking Group Tent
What can the UK learn from international agroforestry? With Edd Colbert, Elaine Springgay and James Whitehead	This session explores how the UK might accelerate its agroforestry ambitions by drawing on experiences from the Asia-Pacific, Latin America, and African regions. These global hotspots have long embraced agroforestry as a tool for climate resilience, food security, and sustainable livelihoods, often through innovative, community-led, and cross-sector collaborations. Discover practical insights, policy approaches, and partnership models that can inspire the UK's own agroforestry journey. Let's reimagine what's possible when we think globally and collaborate locally.	11:00	Shakespeare Martineau and Marrons Tent
Does it stack up? How to approach agroforestry economics With Ian Knight	Estimating the physical and financial performance of agroforestry demands a different approach to many farming systems. Capital and other start-up investment will only reap returns for the farm business in future years. Markets will also change over the lifetime of a project. Hear from an experienced agroforester on how to navigate this challenge, building a robust but adaptable financial model for a new system.	11:00	ReForest Training Hub
Helping tree roots thrive with our mycorrhizal inoculant With MycoChar	MycoChar introduces a diversity of beneficial mycorrhizal fungi spores directly to tree roots at planting. These fungi form intricate symbiotic relationships with the tree's root system, significantly increasing its surface area. Water and nutrient uptake are enhanced, optimising the tree's growth and disease resistance. Join us to learn more about the product, what sets it apart from other inoculants on the market and how we have been using it on our own tree planting projects for the last several years.	11:30	Demo area
Agroforestry and public goods With Dr. Tom Staton	Public goods, ecosystem services, biodiversity, carbon, regenerative and agroecological benefits... the spaghetti of claims and terms used for the environmental improvements that agroforestry can deliver can be confusing, and what about food production? This session will introduce this broad subject with examples and pointers to some of the research, evidence and tools available to help make informed decisions.	12:00	ReForest Training Hub

Session details - Day two - Thursday 11th

Session name	Description	Time	Location
Rickey's Alkaline Market Garden & Fruit Forest With Rickey Bryan	Regenerative closed loop systems and farm tech for alkaline soils.	13:00	Farm walks
Hedge management safari With Megan Gimber	Join this tour of Woodoaks' hedges and edges to celebrate the UK's rich cultural heritage of hedgerows. You'll learn about different styles of hedgerows and the various management techniques that can be used.	13:00	Farm walks
Lessons from traditional agroforestry on the European continent With Dr Will Simonson, Francisco Alves, Dan Carne and Dr Rico Hübner	As in the UK, agroforestry has been a traditional and highly important part of farming in many regions of continental Europe. In this session we will hear about the current practice of woodmeadows in eastern Europe, orchard meadows in Germany, and wood pastures in Iberia. What can revival of these systems tell us about possibilities for restoring traditional agroforestry in the UK and helping to address the challenges of climate change?	13:00	Sainsbury's and Lloyds Banking Group Tent
Exploring the value of treescapes through whole farm tree plans With Clive Thomas, Mark Edward, Jim Pettyfer and Liam McNully	Discover the outcomes of a pioneering project that developed a practical farm treescape functional assessment - a tool to evaluate how well a farm's trees support its business goals. Hear from the project lead and participating farmers about the process, insights gained, and real-world value delivered. Funded by the Forestry Commission's WIMFIF, this session offers actionable takeaways for integrating trees into farm planning. Ideal for farmers and advisers seeking data-driven agroforestry strategies.	13:00	Shakespeare Martineau and Marrons Tent
Climate change adaptation through agroforestry With Delyth Lewis Jones, Rachael Madeley-Davies and Henry Reynolds	Several case studies will demonstrate how agroforestry can enhance carbon storage, regulate microclimates, reduce soil erosion, and support natural flood management and catchment health. Panellists will explore how these benefits align with public goods and ecosystem services, while also highlighting policy and market opportunities. The session will show how agroforestry can contribute to farm business diversification and build resilience in the face of a changing climate.	13:00	Farmers Weekly Tent
Growing the future: agroforestry education and skills development in the UK With Dr. Ashley Hardaker, Dr Jonathan Code, India Blake, Bid Webb and Maureen Kilgore	This panel explores the future of agroforestry training and education in the UK, addressing skill gaps and how to equip farmers, students, advisers and land managers with the knowledge needed for widespread agroforestry adoption. It examines current educational models, innovative training approaches, and cross-sector collaboration. The session aims to develop strategies for embedding agroforestry in education and policy, fostering a skilled workforce ready to tackle environmental challenges through integrated land management.	13:00	Affinity Water Tent
Meet the farmer: James Bucher With Janie Caldbeck	Join Janie Caldbeck in conversation with farmer James Bucher as they discuss the design and management of a 13ha eight-row diverse agroforestry scheme at Hall Farm.	13:00	ReForest Training Hub

Session details - Day two - Thursday 11th

Session name	Description	Time	Location
The Farrelly method - electrifying agroforestry fencing demo With Fred Farrelly	Farmer innovation at its best. Fred Farrelly, a farmer from Ireland, has devised and refined a low tech approach to fencing trees within his silvopasture fields. The method not only eliminates loss of grazing land, it also helps root growth and reduces plastic use.	13:30	Demo area
Land App agroforestry design toolkit With Dan Geerah and Michael Burke	Join this session for a live demonstration on how to create digital designs for alley cropping, wood pasture and traditional orchard systems using the agroforestry design toolkit created by Land App in partnership with agroforestry consultant Edd Colbert and Shropshire Council.	14:00	ReForest Training Hub
Using wool to protect trees - With Cheviot Trees With Jonathan Cameron and Tim Oliver	Explore the use of BioWool mulch mats, made from UK waste wool, to improve tree establishment and suppress weeds naturally. This session will demonstrate how BioWool works, including its deer-detering lanolin properties, degradation process, and application techniques. Learn how this sustainable mulch mat can replace imported alternatives and help ensure healthier, more successful tree growth on your farm or project.	14:30	Demo area
Farm woodland opportunities With Clive Thomas	Whilst only a few farms have formalised in-field agroforestry currently, almost every farm has some woodland. Like hedges, the opportunities for these woodlands to deliver more farm benefits are often overlooked. Woodoaks Farm is no exception. With the revised agroforestry handbook now having a chapter on farm woodlands, join this walk to explore and discuss these opportunities, including woodland products, integrating livestock and using woodlands as a diversification setting.	15:00	Farm walks
Fungal compost walk With Daniel Iddon	The importance of fungal communities in forestry, agroforestry and agriculture soils and how to create fungi compost.	15:00	Farm walks
Grant funding for trees on farms With Jack McCrickard, Eleanor Lewis and Zoe Knight	The start-up costs for agroforestry systems can feel daunting, but funding opportunities exist to help bridge the gap. In this session, panellists will share the latest information on grant funding as well as useful tips for how to make your applications successful. Panellists will compare different grant schemes with plenty of time to answer your questions.	15:00	Sainsbury's and Lloyds Banking Group Tent
Opportunities for farmer-led research on silvoarable agroforestry With Dr. Amelia Hood and Rosy Scholes	Learn about the Trees-in-fields Network, a network of farmers to co-design silvoarable experiments on tree and understorey management. This project aims to create a community of silvoarable farmers who can learn from each other.	15:00	Shakespeare Martineau and Marrons Tent

Session details - Day two - Thursday 11th

Session name	Description	Time	Location
Ecological wildlife management With Liza Randall, Kay Haw, David Hooton and Hugh Van Cutsem	This session examines the role of targeted wildlife management in supporting resilient agroforestry systems. It will cover strategies for mitigating grey squirrel impacts on native woodland regeneration and integrated approaches to deer management, including population control, ecological impact mitigation, and the development of sustainable venison supply chains. The session will explore practical, policy, and supply-side considerations essential for managing wildlife within multifunctional and productive landscapes.	15:00	Farmers Weekly Tent
Scaling agroforestry through community tree nurseries With Jon Haines, Samantha Green, Liz Trenchard, Helen Aldis, Ben Norwood and Phil Knott	Discover how community tree nurseries (CTNs) contribute to local tree production, biodiversity, and landowner collaboration. This session shares research, practical models, and real-world examples of community-led nurseries in action. Short talks and interactive discussion will explore how CTNs and agroforesters can work together to overcome challenges, share resources, and scale up impact across landscapes.	15:00	Affinity Water Tent
How to: PA4 agroforestry plans With Simeon Day	This workshop will guide participants through completing the grant-funded PA4 agroforestry plan in England. Whether or not you plan on applying for government funding, this session will cover a range of topics to make sure you leave feeling ready to develop your own agroforestry plan.	15:00	ReForest Training Hub
Final plenary - reflections on the show With Sue Pritchard	Join Sue Pritchard and a panel of farmers and foresters for reflections on the show and thoughts for the future.	16.30	Sainsbury's and Lloyds Banking Group Tent

All information is correct at the time of printing and is subject to change without notice.

Bringing expertise to trees, soil and sustainable land use

Green-tech supports landowners, farmers and environmental professionals with products and advice for sustainable land management.

From tree planting and root protection to wildflower establishment and soil improvement, we can help you create long-term environmental gains.

Whether integrating trees into productive land or enhancing biodiversity, we offer over 5,000 products and over three decades of expertise.

**For farmers looking to plant trees, we offer a
unique partnership to design, plant and manage
the trees and sell the carbon units for you.**

Supporting farmers since 1765

Today, Lloyds Banking Group is the largest finance provider to UK agricultural businesses, supporting more than 40,000 farming customers across the country, as well as working with businesses up and down the food supply chain.

Our experts have been working closely with farmers for generations to provide the support they need to help their businesses thrive, and to ensure they are sustainable long into the future.

Woodland Trust

In partnership, funding planting of trees and hedgerows
